Skills

Hard Skills - Html5, Css3, Bootstrap5, Tailwind CSS, Material UI, Ant Design, JavaScript, Typescript, Reactjs & Redux, Nextjs, Git&GitHub&GitLab.

Soft Skills - I possess the ability to work well with a team, respect for elders, timely completion of assigned tasks, respect for values, honesty, and loyalty.

Experience

[CinemaProject](#) - is an online streaming platform designed for seamless viewing of movies and TV shows on demand. It offers a wide variety of content, including the latest blockbusters, classic movies, and popular TV shows. The platform integrates external APIs to dynamically fetch and display movie data. Collaborated with UI/UX designers to ensure an intuitive and visually appealing user interface.**Technologies Used: Frontend:** React.js, React Router, TailwindCSS, **UI Libraries:** Material-UI Icons, Emotion, **API Integration:** Axios, **Others:** React Multi Carousel, React Slick

[PlantProject](#) - I used the Redux library in this project because it allows us to manage states from a single place. Additionally, I used libraries such as Axios, Slick Carousel, and TailwindCSS in this project.

[MaxWay](#) - An online food ordering application built with React, React Router, Redux, and TailwindCSS. It offers a user-friendly interface for browsing food items, managing orders, and learning about the restaurant.
